APPENDIX -

OUTDOOR AGEING BEHAVIOUR OF PERSPEX® CAST ACRYLIC SHEET FOR SIGN APPLICATIONS

1. Elastic Modulus

The rigidity of Perspex® will remain substantially unchanged in service. This means that the elastic modulus of a sample cut from a section of Perspex® will not be less than 2500 MPa as delivered and for ten years after delivery (test method: ISO 178 measured on specimens removed from the exposed Perspex® installation).

2. Tensile Strength

Perspex® will suffer no unacceptable change in brittleness. This means that the tensile strength as delivered and for ten years after delivery of a sample cut from a section of Perspex® will not be less than 50 MPa. (test method: ISO R 527 measured on specimens, removed from the exposed Perspex®).

3. Colourfastness

During a ten year outdoor exposure period all coloured surfaces can be expected to exhibit at least some degree of change. LUCITE guarantees that any changes in colour of the Perspex® sheet will be so small as to pass undetected by the casual observer at street level.
