

GRIPHEN™

GRIPHEN™ is a transparent glycol modified copolyester that fulfill the most diverse requirements. It is extremely easy to fabricate and to thermoform. The easy fabrication combined with the high transparency and high impact strength has made GRIPHEN™ to a reliable solution in many applications where A-PET, PVC, PMMA or PC traditionally has been used. GRIPHEN™ is a cost effective plastic. Faster forming cycles save time, labour and money.

Qualities:

- No pre drying required
- Easy to fabricate
- Very high resistance to chemicals
- Excellent transparency
- Light weight compared to glass
- Excellent impact strength
- Good thermoforming properties
- Compatible with foodstuffs (not UV version)

GRIPHEN™ UV provides an enhanced weather resistance. The co-extruded protection layer contains an ultraviolet absorber that protects the sheet from the harmful effects of sunlight.

Application areas:

Indoor and outdoor signs, shelving and racking systems, food displays/bin/dividers, thermoformed covers, vending machine faces, medical equipment (packaging etc), industrial equipment (machine coverings, machine protections and many different kinds of technical parts).

Available in:

Colours upon request.

Arla sheets are produced from resins that are certified according to UL 94. Furthermore, several products have been tested according to DIN 4102 (class B1 and B2), DIN 5510 (class S3, SR1 and SR 2, ST1 and ST2), BS 476 part 7 (class 1Y), NF P 92-501 (M2), CSE/75/A (class 1), CSE/RF/3/77 (class 1), UNE 23.727-90 (class M.4). A list of products that have been tested and their respective classification is presented on www.arlaplast.se. If information regarding classifications according to other standards is needed, it is often possible to retrieve information from our raw material suppliers. Please contact our technical support.
